

**Phd Program in Molecular Medicine & Medical Biotechnologies
Guest Speakers Lectures & Advanced courses
2025**

**Friday, September 26th, 15:00
Seminar classroom, 1 floor Torre Biologica**

"Inducing lipid oxidation in lymph nodes to inhibit cancer metastasis"

**Prof. Jessalyn Ubbelacker,
Harvard Medical School (USA)**

Dr Ubbelacker is Assistant Professor of Molecular Metabolism at Harvard T.H. Chan School of Public Health. Her laboratory gave fundamental contribution in the discovery of how how lipid availability in the tumor microenvironment promotes cancer cell progression and metastasis.

Invited by: F. Carlomagno
