

**PhD Program in  
Molecular Medicine and Medical Biotechnology**

**Campus Biomedico  
Via S Pansini 5, Napoli**

**3-year program**

**Yearly application calls**

**Fellowships available**

**Possible stages in foreign academic  
institutions and biotech laboratories**

**English as the official language**

**The main focus of the program is understanding human diseases at the molecular level. This is pursued through intensive laboratory research training in biochemistry, cell and molecular biology, microbiology, immunology, molecular oncology, molecular diagnostics, innovative therapies, disease models and computational biology**
